EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE CLAIMS:

- a. **CANCEL** claims 9, 19 and 29.
- b. **REPLACE** claim 1 **WITH**:

A system of facilitating the dissemination of information comprising a target, said target further comprising:

- (a) an information display that is visible to a plurality of interested users;
- (b) a memory assembly for storing a URL for a web-site related to the display;
- (c) a transmitter assembly adapted to transmit the URL with a filtering code adapted to be used in a respective hand-held transceiver to avoid receiving interference or incorrect information ; and
- (d) an identifier that indicates to the plurality of users that the target comprises the memory assembly and transmitter,
- (e) a comparator; and
- (f) a register adapted to receive and delineate said filtering code and then to subsequently transmit said filtering code to said comparator:
 - (i) wherein the identity of a specific target to be read by, and/or interfaced with, said hand-held transceiver is registered by said interested user entering a code into said hand-held transceiver, and wherein said entered code is representative of said specific target;

(ii) wherein said comparator compares said filtering code received from said register with said entered code entered by an interested user; and, if said codes are identical, then permitting said URL to be transmitted to said hand-held transceiver,

(iii) whereby a respective interested user upon seeing the display and graphic identifier may use a respective hand-held transceiver to receive the URL transmitted by the target and selectively activate the URL through a browser independent of the target.

c. **REPLACE** claim 11 **WITH**:

A system of facilitating the dissemination of information comprising:

(a) a target comprising:

(i) a display that is visible to a plurality of interested users;

(ii) a memory assembly for storing a URL of a website related to the display;

(iii) a transmitter assembly adapted to transmit the URL with a filtering code adapted to be used in a respective hand-held transceiver to avoid receiving interference or incorrect information;

(iv) an identifier that indicates to the plurality of users that the target comprises the memory assembly and transmitter; and

(b) a hand-held transceiver;

(c) a comparator; and

(d) a register adapted to receive and delineate said filtering code and then to subsequently transmit said filtering code to said comparator:

(i) wherein the identity of a specific target to be read by, and/or interfaced with, said hand-held transceiver is registered by said interested user entering a code into said hand-held transceiver, and wherein said entered code is representative of said specific target;

(ii) wherein said comparator compares said filtering code received from said register with said entered code entered by an interested user; and, if said

codes are identical, then permitting said URL to be transmitted to said hand-held transceiver,

whereby a respective interested user upon seeing the display and graphic identifier may use the hand-held transceiver to receive the URL transmitted by the target.

d. **REPLACE** claim 21 **WITH**:

A method of facilitating the dissemination of information comprising the steps of:

- (a) providing a target wherein said target comprises:
 - (i) a display that is visible to a plurality of interested users;
 - (ii) a memory assembly adapted to receive and store a URL related to the display ;
 - (iii) a transmitter adapted to transmit the URL with a filtering code adapted to be used in a respective hand-held transceiver to avoid receiving interference or incorrect information; wherein the identity of a specific target to be read by, and/or interfaced with, said hand-held transceiver is registered by said interested user entering a code into said hand-held transceiver, and wherein said entered code is representative of said specific target
 - (iv) an identifier that indicates to the plurality of users that the target comprises the memory assembly and identifier;
- (b) receiving and storing the URL in the memory assembly;
- (c) transmitting the URL together with said filtering code;
- (d) receiving and delineating said filtering code at a register and then subsequently transmitting said filtering code to a comparator:
- (e) comparing, at said comparator said filtering code received from said register with said entered code entered by an interested user; and, if said codes are identical, then permitting said URL to be transmitted to said hand-held transceiver;

whereby a respective interested user upon seeing the display and graphic identifier may use a respective hand-held transceiver to receive the URL transmitted by the target.

Allowable Subject Matter

2. Claims 1-8, 10-18, 20-28 and 30 (now renumbered 1-27) are allowed.
3. Applicant is encouraged to review the above amendments as well as the unamended claims to help ensure that all typographical and grammatical errors have been identified and corrected as well as to verify that each claim term has proper antecedent basis.
4. The following is an examiner's statement of reasons for allowance. These reasons for allowance should not be interpreted to imply that limitations not specifically mentioned are immaterial to patentability. The specific limitations identified below have been considered in combination with the entirety of the claim in determining patentability.

The prior art of record fails to disclose or fairly suggest a system/method as claimed where a hand-held transceiver receives a URL and a filtering code from a target storing a URL related to the target, a user enters a code representative of the target, such as a code printed on the target itself, into the hand-held transceiver, and the transceiver compared the entered code with the filtering code, and permits transmission of the URL to the memory of the hand-held transceiver.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to AARON STRANGE whose telephone number is (571)272-3959. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Firmin Backer can be reached on 571-272-6703. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
